Abstract (en)  
[origin: WO2006036720A2] An business process management system and method for using multiple products or business applications. The business process management system includes a process designer interactive portion configured to receive information for designing a business process, and a process forming portion configured to create or modify the business process based on the information received by the process designer interactive portion. A process forming portion is configured to select a plurality of products or business applications to create or modify the business process. An business process management system and method provide an interface to handle multiple versions of products.
