Abstract (en)
[origin: EP1811095A2] The screen (1) has a self-supporting body (2) and vertically arranged supports (6-8) for mounting the screen. The body is designed as a monolithic structure body that is composed of flexible, dimensionally-stable and sound-absorbing foam plastic. The body is designed around a horizontal axis in a bend-proof manner and around a vertical axis in a bendable manner. The body is connected with the vertically arranged supports in a form-fit manner. An independent claim is also included for a method for manufacturing a body for a mobile partition screen.
