Abstract (en)
[origin: EP1811104A2] The system has an installation module for guiding installations (5) through walls or floor ceilings (3). The module has an installation set (2) that includes installations in a place, and a plate (1) that is held in a given opposite place. The plate has sound-absorbing and/or fire-absorbing and/or heat absorbing characteristics, and covers holes (4) that guide around the installation set through the walls or floor ceilings. A screw fastens the plate at the walls or the floor ceilings. A sealing band seals between the plates and the walls and/or ceilings. Independent claims are also included for the following: (1) an installation module for an installation system (2) a method for guiding installations through walls or floor ceilings.
