Abstract (en)
Provided is an intrusion preventing device of a structure with excellent appearance for causing an intruder to catch his/her body in thorn portions to prevent intrusion. A plurality of elongated stalk members 3 is provided in an installation base 1 to protrude, plate-shaped members 5 are provided to protrude through tributary stalk members 4, and pluralities of thorn portions 7 are provided in edge portions of the plate-shaped members 5 to protrude. The plate-shaped members 5 are arranged spatially in three-dimensions, and the intruder is caught in the thorn portions 7 in the edge portions of the members 5 and prevented from intruding. The entire device can be provided with a shape imitating the form of a plant, has decorative characteristics, and does not impair the appearance.
