Abstract (en)

[origin: EP1811121A2] The bearing has a bearing body (1) with a mounting plate, and a carrier unit (15) for connecting the bearing body with a part of a building unit. A clamping unit fixes the bearing body in the carrier unit. Two vertically running slot boreholes are provided at a retaining part (17) on the carrier unit, where one of the boreholes is connected with a neighboring edge by a slot. A fastening bolt is fastened to the bearing body, and is inserted into the carrier unit by the slot.
