Abstract (en)

A supporting structure (10, 110) for posters in general, comprising a reticulated, free-standing frame (12), mounted on a base (14) with which it substantially defines a space (16) accessible from outside the frame (12) itself and wherein at least part of said frame (12) is equipped with means (18, 118) for removably constraining a poster comprising translucent advertising panels (20, 120), at least one light source (22) being provided in said space (16) for the backlighting of said advertising panels (20, 120); said base (14) is transported by means of a respective plurality of wheels (24), of which one pair are directional wheels, and the structure comprises a motor with substantially zero or minimal polluting emissions for driving at least one pair of driving wheels of said plurality of wheels (24) and an energy source for feeding said motor.
