Abstract (en)
[origin: WO2006051336A2] The present application relates to a filtration system (1) for filtering particulate material from a fluid. The filtration system (1) has a system inlet (7), a bypass valve (85), a first filter (21), and a system outlet (9). The bypass valve (85) is operable to place the system inlet (7) in fluid communication with the system outlet (9) and to allow at least a portion of the fluid passing through the filtration system to bypass the first filter (21). The application also relates to methods of filtering fluid and installing a filtration system.
