Abstract (en)
[origin: WO2006051208A1] The invention relates to a folding construction, comprising at least six walls (P, fp, fl, T), defining an inner living or storage volume, of which one is a floor (P), four are elevation walls (fp, fl), of which two are longitudinal elevations (fl) and two are gable elevations (fp), arranged around the floor (P) and covered by a roof (T), made up of two inclined roof panels (Ta, Tb), characterised in that each wall comprises an articulated (C), sliding (G), or freely-moving connection (C, G) with at least one other wall. The invention is of application in all types of construction, such as bungalows or chalets and is also of application to toys or containers for the transport of merchandise.
