Abstract (en)
[origin: WO2006024264A1] The invention relates to a combined closing device comprising a main lock (1) and an additional lock (2), especially for high doors (9) of motor vehicles. At least respective opening mechanisms (5, 6) of the main lock (1) and the additional lock (2) are coupled with each other for opening. The inventive device is characterized in that at least one of the locks (1, 2) is provided with a closing aid for servo locking.
