Abstract (en)
[origin: EP1813172A1] The self service product detection station has a read device for collecting goods, a data processing system, two bilateral arranged storage area for goods or shopping basket or shopping cart, and a dormant scale (17) attached in front of the self service product detection station. The dormant scale is integrated in a base plate (16), which is arranged before the self service product detection station. An independent claim is also included for a method for collecting goods at self service product detection station.
