Abstract (en)

[origin: EP1813564A1] The device has a code carrier (5) extending over the transport height of an elevator cabin that is provided with code and a device on the cabin for reading and evaluating the code. The device on the cabin for reading and evaluating the code is arranged in a housing (1) and the code carrier is guided in the housing by a sliding guide (4), whereby when the cabin moves the code carrier slide in the guide past the device for reading and evaluating the code.
