Abstract (en)

The system has a data reader (22) for reading of data stored in a data inscription, and a cancellation unit (24) for cancellation of the value-token. A data memory (34) is provided for storage of the read data and arranged in a server (32), where the value-token is formed through a bar-code and the data is transmitted to a personal computer (36). The data memory is formed through a memory and/or multimedia card e.g. flash-memory-smart card. An independent claim is also included for a method for storage of data and for cancellation of value-token.
