Abstract (en)
A circuit breaking apparatus includes: a circuit breaker (1) including a first opening/closing mechanism portion (15) that moves a first movable contact (161); an external auxiliary unit (2) that is disposed on a side face of the circuit breaker and includes a second opening/closing mechanism portion (25) that moves a second movable contact (262); and a leakage detection unit (3) including a third opening/closing mechanism portion (35) that is caused to operate by a trip coil (39). The first opening/closing mechanism portion and the second opening/closing mechanism portion are connected with a first coupling member (41), and the second opening/closing mechanism portion and the third opening/closing mechanism portion is connected with a second coupling member (42).
