Abstract (en)
[origin: WO2006051177A1] The invention relates to an automation of mail sorting. According to the invention: a) a number of sorting criteria (50) are defined; b) one or more possible values to allocate to each criterion (31, 33, 34) is/are selected, and; c) at least one Boolean function (32a, 32b) is formed in which the possible values associated with distinct criteria are combined by the logical operator AND' while authorizing a combination by the logical operator OR' of all or a portion of the possible values associated with a same criterion.
