Abstract (en)

[origin: EP1658924A1] The building part (1) has a filled impression (7), running in one direction (10) filled with a second material type. It has an additional impression (13) which runs obliquely (11) to the longitudinal direction of the first impression. The first impression is filled with filler metal and/or a substitute and can have a L-, T-, or H-shape. The additional impression forms an angle of at least 45[deg]. 60[deg] 75[deg] or 90[deg] to the direction the first impression runs in.
