Abstract (en)

[origin: WO2006053863A1] The invention relates to a structure element for a seat, in particular, for a motor vehicle seat, comprising several positioning modules (2, 2i, 2ii) on which an adjuster for the seat may be optionally provided. The invention further relates to a seat structure comprising the structure element with an adjuster and, furthermore, a seat with the structure element or the seat structure.
