Abstract (en)

[origin: WO2006035211A2] A container or container dank (100, 200, 300) comprises a pair of opposed side wall portions and an opposed front wall portion and rear wall portion, each wall portion being connected to a base portion at a fold line and at least one opposed pair of walls being provided with a lid section. At least one portion has a web of material (12, 230, 330) adapted to retain an article within a container formed from the blank (100, 200, 300). Apparatus for and methods of forming a container blank having a web attached thereto and apparatus for and methods of forming a container from a material web lined dank are disclosed with reference to the direction in which the improved tension characteristics of the web are applied. An apparatus and method for filing, closing and sealing an open-mouthed container is also disclosed.
