Abstract (en)
[origin: WO2006051099A1] Iron (10) comprising an ironing plate (12) associated with heating members (14), made of a first heat-conducting material and having a lower surface (15) lying on a first plane. The greater part of the lower surface (15) is covered by an ironing element (13) made of a second heat-conducting material, different from the first material. The ironing element (13) has an ironing surface (16) lying on a second plane substantially parallel to the first plane, and protruding by a determinate value from the lower surface (15), so that the ironing plate (12) has a step (17) along a perimeter of the ironing element (13).
