Abstract (en)
[origin: WO2006053364A1] The invention relates to a hinge, particularly for movable furniture parts (1), comprising: at least seven rotational pins; at least two stop parts (2, 3) for fastening to furniture parts (1) or the like, and; a linear damping device for damping an opening and/or closing movement of the hinge. This hinge is designed in such a manner that all components (8, 9) of the linear damping device (7) execute a motion relative to both stop parts (2, 3) during the opening and/or closing movement of the hinge.
