Abstract (en)

[origin: WO2006056191A1] The invention relates to an air heater (12) to be integrated into an air-carrying housing of a motor vehicle. The invention is characterized in that a flange plate (48) seals at least one exhaust gas discharge (54) from the vehicle interior by means of sealing elements between a fitting site for the air heater (12) and the flange plate (48) and between the air heater (12) and the flange plate (48).
