Abstract (en)

[origin: WO2006056189A1] The invention relates to a heat exchanger (10) for an air heating device (12) which is integrated into a housing which guides air. Said heat exchanger comprises a heat exchanger body (14) which is provided with a longitudinal axis. According to the invention, the heat exchanger body (14) comprises, on the external side thereof, a plurality of corrugated ribs (28) which extend, essentially, along the periphery thereof, and which are provided on the surfaces of the heat exchanger.
