Abstract (en)

[origin: WO2006056314A1] The invention relates to a coupling conductor (1) for a YIG Filter (2) or YIG oscillator. Said conductor is produced from a metallic foil by the erosion, laser cutting and/or etching of a metallic foil (7). According to the invention, the coupling conductor (1) comprises at least one curved section (17), which at least partially surrounds a YIG element (6) and at least one conductor section (18).
