Abstract (en)

A flex control device (50), particularly for the quarter (4) of a motocross boot, which comprises a soft upper (2) provided at the rear with a semirigid cuff (7) and a semirigid counter (8), which are connected respectively to the upper (2) and to the upper (2) and/or sole (5). The device is constituted by a first rod-like element (19) and a second rod-like element (20), the first rod-like element (19) being rigidly coupled to the counter (4), the second one (20) being selectively associable with the quarter (4), the first and second rod-like elements (19, 20) being slidingly associated in contrast with at least one elastically deformable element (31).
