Abstract (en)  
[origin: EP1815953A2] The stopper (1) has stock rail arranged on a machining table of the processing machine. Each stop element (51,71) is assigned a display unit (6,8) which is activated by activation unit (3,4). The display unit is activated by the activation unit depending on the stop element, which is to be inserted, for the display of a directly fixed or directly effecting or already accomplished positioning movement. Independent claims are included for the following: (1) processing machine (2) a method for processing of work pieces.
