Abstract (en)

A device (1), for assembling a sanitary fixture control plate (2) to a supporting frame (3), has at least one tooth (5) and a seat (7) cooperating with each other and carried by the plate (2) and the frame (3) respectively, or vice versa; and a flexible member (13) associated with the seat (7) and cooperating with the tooth (5). The flexible member (13) is aligned with the seat (7) in a direction parallel to the plate (2) and in a predetermined slide direction (A), and the portion of the flexible member close to the seat (7) in the slide direction (A) has a projection (16). When assembling the plate (2) to the frame (3), the tooth (5) cooperates with the flexible member (13) in the slide direction (A) to engage the seat (7).
