Abstract (en)
[origin: EP1816280A2] Lamella arrangement comprises a holding element (3) with an extension part (4) for holding a lamella (1) and a foot part (5) for interacting with a profile rail (2). The foot part is arranged on a receiving groove on its front surfaces to receive a bar (8) of the profile rail protruding toward the front surface of the foot part. Preferred Features: The front surfaces of the foot part have three receiving grooves arranged at the same angle to each other. The foot part has a cylindrical structure.
