Abstract (en)
[origin: EP1816418A2] The device has an interior surrounded by a heat insulating body (1). A door (7) is provided for sealing the interior. A number of chilled product carriers (5) are arranged in the interior (4). An intermediate space is located between the front side of the chilled product carrier and the door. The front side of the chilled product carrier is turned towards the door. The width of the intermediate space corresponds to the diameter of a commercial wine bottle. The intermediate space is defined by a storage space and the wine bottle is mounted on the storage space.
