Abstract (en)

[origin: WO2006042641A1] A metering device for at least one medium, with a medium storage unit and a pumping system connected to the medium storage unit, and in which the medium storage unit or the pumping system comprises a venting valve (44) which is elastically held in the closed position, is known. According to the invention, a control member (41) is associated with the venting valve (44) in such a way that the control member opens the venting valve as a result of a pumping movement of the pumping system. The device is used for metering a medium.
