Abstract (en)

[origin: WO2006059896A1] The present invention relates to a vehicle (1). The vehicle comprises a mobile frame; at least one component on or at the frame to be energized with a power supply, and a power source on or at the frame for providing the power supply to the component, characterized by an external connection (12) which is connected to the power source and which can be connected to an external installation (13, 14, 9) for selective energizing thereof with the power supply.
