Abstract (en)  
A snowboard (9) has a clamp plate (1) with a concentric ring (2) to which the ski boot binding (4) is attached. The unsecured ring is free to rotate in azimuth to a selected direction relative to the board. The clamp is associated with a clamp that when operated holds the ring in a fixed direction relative to the board and direction of travel.

Abstract (de)  
Bei Snowboard-Bindungen war bisher das Verstellen der Schrägstellung zum Board möglich, jedoch nur mittels aufwendiger Montagemaßnahmen. Erfindungsgemäß wird eine Schnellverstellung vorgeschlagen, um auch ohne Öffnen der Bindung den Fuß z.B. in Längsrichtung zum Board ausrichten zu können.
