Abstract (en)
[origin: EP1818105A1] the spray gun has a supply container (21) designed as a paint tin (22) or paint bag adapted to match the gun so that it can be fitted directly onto an adaptor attachment (11) designed as a cover (12) or plate and held on the handle (3) through a web (13,14). The container can be a metal tin which screws into an internal thread (15) on the adapter through an external thread (24) around the edge of the tin opening (23). A riser pipe from the paint tin fits with the riser pipe of the spray gun.
