Abstract (en)

A disposable container comprises a sealed container body (1) containing a soluble substance (2), wherein the container body (1) is maintainable in a substantially flat, folded state and deformable into a cup shape. A method for producing a disposable container comprises the steps of manufacturing a container body (1), folding the container body (1), filling the container body (1) with a soluble substance (2) and sealing the container body (1), wherein the container body (1) is manufactured so as to be foldable in a substantially flat shape and deformable into a cup shape.
