Abstract (en)

[origin: EP1818464A1] The channel (1) has a tray-shaped groove (2.1) and a channel module (2) with a drain opening (2.2), where a frame (3) is attachable on the channel module. A grid (4) is inserted in the frame that includes projections (3.2, 3.3) at two sides that are adjacent and/or opposite to each other. The projections are formed to engage the frame in the channel module. The projections are arranged to each other, such that the frame is movable about 5 millimeters in a contact area of the projections in a horizontal direction relative to the channel module.
