Abstract (en)

A mounting fitting 10 for mounting in a floor drain 1 is disclosed. The floor drain 1 is placed in its position before casting the floor, and where the floor drain is fastened to a sidewall in a room where the drain is placed in order to be fixed during casting of the floor. The mounting fitting 1 includes a central support part 12 which at each end has a contact face 16 for contact against the wall and a contact face 14 for contact against a face 20 on the floor drain. Each contact face 14, 16 is provided with apertures 17, 18 for receiving a releasable fastening means which is adapted to interact with corresponding fastening means 7 in the wall and the floor drain. This design enables separating the mounting fitting 10 from the floor drain 1 and from the wall after the casting and hardening of a floor. The floor drain 1 will thus not constitute a permanent connection between the wall and the floor. Furthermore, it will be possible to place the floor drain spaced apart from the wall.
