Abstract (en)

[origin: EP1818527A1] An apparatus (9) for inhibiting / throttling a fuel injector (1), in a multi-fuel endothermic engine, inserted in an electrical drive circuit and current-controlled by measuring a value of a control current circulating in a measuring section (5) of the drive circuit, comprises means for inserting / removing an inhibiting /throttling current in an electrical drive circuit, upstream of the measuring section, so that said inhibiting / throttling current is added to a drive current delivered by an electrical power supply (2) inserted in the drive circuit. A method for inhibiting / throttling a fuel injector, in a multi-fuel endothermic engine, current controlled.
