Abstract (en)  
The collet has a plate (1) comprising an opening (3) for the fixation on an axle (5) of a balance of a balance-hairspring adjusting system in a mechanical clock movement, where the collet is formed of glass, quartz or silicon. A securing unit secures a hairspring (7) at a determined junction point of the collet. The collet has an asymmetric contour (9), which follows, from a place to place at a constant distance, the contour of a turn (11) of the curve at the interior. Recesses (13) reposition the center of gravity of the collet or collet-hairspring assembly on the balance axle.

Abstract (fr)  
La virole, qui peut être réalisée en une seule pièce en même temps que le spiral, est formée par une plaque (1) qui comporte une ouverture (3) pour la fixation sur un axe (5) de balancier et a un contour (9) asymétrique qui suit à une distance d sensiblement constante le contour de la première spire (11) de la courbe à l'intérieur. La plaque peut en outre comporter des évidements (13) permettant de repositionner le centre de gravité g sur l'axe de balancier (5).
