Abstract (en)
[origin: EP1818882A2] A gaming machine includes: a display; an operation unit; a processor; and a printer. The processor is operable with the display to: provide a game using a suit of cards to a player by displaying the cards on the display and by allowing the player to input operations through the operation unit; and select a card from among the cards in accordance with a progress of the game. The printer prints an image of the selected card on a blank card to be provided as a printed card to the player.
