Abstract (en)

[origin: WO2006042603A1] The invention relates to a method for prolonging the serviceable life of the broad side walls of a mold, which is formed from broad side walls and narrow side walls, in a continuous casting installation for continuously casting a metal casting. In order to significantly prolong the serviceable life of a mold, in particular, for casting long sequences with the same casting width, the invention provides that a casting center axis (11, 11<sub
