Abstract (en)

[origin: WO2006048087A1] The invention relates to a method for producing a solid odorous substance from at least one odorous substance that is liquid at normal temperature and at least one carrier material (6) that is solid at normal temperature. According to said method, the at least one fine-particle carrier material (6) is exposed to a spray mist (7) of at least one liquid odorous substance in a fluidised bed.
