Abstract (en)

[origin: WO2006008098A2] The invention relates to the use of nucleic acid sequences for regulating gene transcription and expression, said novel promoters and expression units, methods for modifying or inducing the transcription rate and/or expression rate of genes, expression cassettes containing said expression units, genetically modified microorganisms with a modified or induced transcription rate and/or expression rate, and methods for producing biosynthetic products by cultivating the genetically modified microorganisms.
