Abstract (en)

[origin: WO2006012879A1] The invention relates to an information carrier comprising concealed information (23), for arranging on an object (1). Said information carrier (2) comprises a front side and a rear side (22), and a first region and a second region of the information carrier (2) can be detachably fixed to each other with the rear sides (22) thereof. The rear side (22) of the first region of the information carrier (2) comprises the concealed information (23) that is completely covered by the second region (26) and invisible when the second region is connected to the first region (27).
