Abstract (en)

[origin: WO2006061496A1] The invention relates to a terminal (8) for managing resources necessary for displaying at least one Web page (14) composed of at least one multimedia object and of a declaration document containing at least one declaration element of the or each multimedia object. The declaration document and the or each multimedia object are to be downloaded onto the terminal (8) from an item of storage equipment (4) via a communications network (6). The terminal (8) comprises a Web browser (48) for interpreting at least one declaration element of at least one resource (29, 30, 31, 32, 33, 34, 35, 36) necessary for displaying the or each multimedia object, said declaration element of the or each multimedia resource being adapted so that it is contained in the declaration document (18), and said Web browser (48) is capable of transmitting, to the resource manager (47), a request for allocating the or each resource (29, 30, 31, 32, 33, 34, 35, 36) necessary for displaying the or each multimedia object. The invention also relates to a system and method as well as to a structure of a Web page.
