Abstract (en)

[origin: EP1820415A1] The device has a part (4) such as a bracelet (3) for connecting to a watch bracelet (3) having a watch housing. A slot (18) is provided for the part (4) for inserting a pin-like extension (5) transverse to its longitudinal direction to a side of it. The part is open and the final part (2) is a double-armed locking lever (7) which can move from a locking position into a release position. A second arm (10) is provided for a rest (14) for locking position of the locking lever which rests in a recess (19).
