Abstract (en)
The present invention provides a bleachable stretch woven fabric which is excellent in stretchability even after bleaching and a woven product obtained by using the same. A stretch woven fabric characterized by comprising an elastic polyurethane fiber(s) containing two or more metals selected from Mg, Al and Zn in part of a yarn. The metal compound contained in the elastic polyurethane fiber is preferably a composite oxide or a composite hydroxide containing two or more metals, for example, hydrotalcite or a composite oxide obtained by firing hydrotalcite. The stretch woven fabric of the present invention can be suitably used for a bleached stretch denim product.
