Abstract (en)
[origin: EP1820927A2] The bushing module (10) has a lateral adjustment device (14) and a height-adjustment device (16) operated by the tools. The lateral adjustment device has three eccentric bushings, which has three tool housing openings at the lower side, in operational position. The height-adjustment device has three screws, each of which has three tool housing openings at the lower side, in operational position. The eccentric bushing is manipulated by the tool.
