Abstract (en)

[origin: US2009071363A1] A gantry crane is equipped with devices for transporting old and new ties and with pads, which are provided for spacing the new ties. The device for transporting the pads is provided in the form of pincers having two pincer parts that can be displaced relative to one another in a manner that is normal to a longitudinal direction of the frame. The device for transporting the new ties is located between the device for transporting the pads and the device for transporting the old ties.
