Abstract (en)
[origin: WO2007014766A1] In the case of a holder which is suitable for positioning on standing surfaces and is intended for information carriers and/or sheaths (15, 16) for information carriers, it is ensured that the information carriers and/or their sheaths (15, 16), on the one hand, and the holder, on the other hand, are held together by virtue of clamping rails being arranged in grooves of the holder which serve for accommodating a respective bottom periphery of the information carriers and/or information-carrier sheaths (15, 16), the clamping legs of these clamping rails having their outer walls supported on the opposite inner walls of the groove.
