Abstract (en)

[origin: EP1826141A1] A packaging bag (2) includes at least two multi-layered sections (10) adjacent with each other. Each of the at least two multi-layered sections includes an outer film (11), and an inner film (13) layered inside the outer film (11) to contact an object (3) to be packaged. The outer film (11) is movable with respect to the inner film (13), and has a coefficient of friction different from that of the inner film. The outer film is formed of a material having a small coefficient of friction, and the inner film is formed of a material having a large coefficient of friction.
