Abstract (en)

[origin: EP1826303A1] The bathwear of the invention corresponds to the cotton terry cloth fabric type and is made up of microfibre terry cloth fabrics being made on a flat loom and with a three-yarn weave, two of said three yarns being microfibre warp yarns whereas the other yarn being the weft yarn is made of cotton and/or polyester/cotton. One of the two warp yarns is loose and makes up the terry pile, whereas the other one is taut and makes up the ground. The bathwear incorporates designs, logos, anagrams, borders and the like directly on the surface of the fabric. The manufacturing process uses a sectional warper being parametrised for preparing the microfibre, and the upper and lower beams are fitted to the shed loom.
