Abstract (en)
A multipoint lock assembly for a door, hatch or the like, which assembly comprises a lock casing (1), which is provided with a front plate (2) and at least one bolt (3) movable through the front plate, and at least one locking element (9, 10, 11, 12) for securing the door, hatch or the like to the frame on the opposite side of the lock casing (1) with respect to the front plate (2). The locking element (9, 10, 11, 12) is arranged in a separate locking unit (7) to be attached to the lock casing. In addition, the arrangement comprises a force transmission element (3a) movable in accordance with the movements of the bolt (3) and extending through the back wall (1 b) of the lock casing for moving said locking element (9, 10, 11, 12) between a locking position and a free position.
